

TrainerMate

WINDOWS APP / RELEASE 2.0.0 / OCTOBER 2026

Get started. Keep it simple.

Install, connect and run your first check.
Then use the guide whenever you need a reminder.

1. Install and open TrainerMate
2. Create an account or log in
3. Connect Zoom securely
4. One Zoom account or several
5. Add and test a FOBS provider
6. Run a first course check
7. Review courses and make decisions
8. Manage connections and fix a login
9. Pay for TrainerMate Pro
10. Billing, cancellation and receipts
11. Turn on automatic checks (Pro)
12. Choose schedules and notifications
13. Use the calendar (Pro)
14. Help, messages and diagnostics
15. Accounts, updates and what's next

Watch the narrated walkthrough: trainermate.xyz/get-started.html

1. Install and open TrainerMate

Start with the official Microsoft Store version.

Open the Download page

Visit trainermate.xyz/download.html and click Install TrainerMate.

Finish installing

Follow the Microsoft Store prompts. Open Microsoft Store is an alternative route to the listing.

Open the app

Use the Windows Start menu and search for TrainerMate. You can start on Free.

Download TrainerMate

TrainerMate is a Windows desktop app for trainers who want a calmer way to handle course checks, Zoom links and certificates.

Get TrainerMate from Microsoft Store

TrainerMate is now distributed through the Microsoft Store for Windows 10 and Windows 11.

The Store handles installation, signing and future TrainerMate updates for you. Clicking Install TrainerMate starts Microsoft's Store Web Installer so Windows can download and install the Store-signed app. You can also open the full Microsoft Store listing.

Microsoft Store product ID: 9MWHCG72WP2N. For the safest install and update path, use the Store button above.

1 Install • 2 Open Store

Microsoft Store signs and installs the app. Future approved app updates are delivered through the Store.

2. Create an account or log in

Your TrainerMate login is separate from Zoom and FOBS.

Create free account

On the login screen, choose Create free account. Enter your own email address.

Choose a password

Use at least 12 characters, including uppercase, lowercase, and a number or symbol.

Confirm your email

Click the link in your confirmation email. Keep TrainerMate open so it can finish automatically.

Already registered?

Choose Log in and use your registered email and TrainerMate password. Older accounts can use their existing TrainerMate ID.

The diagram illustrates the account creation process in three steps:

- 1 Create an account with your email**: This step involves entering an email address. The example shows 'alex.trainer@example.com' in a text field. A note above the field states: 'TrainerMate will email a confirmation link - click it and the app will finish automatically.'
- 2 Choose one secure password**: This step involves entering a password. A note above the field states: 'Password needs at least 12 characters, with an uppercase letter, a lowercase letter, and a number or symbol.'
- 3 Set up providers and Zoom when ready**: This step is represented by a blue button labeled 'Create free account'.

Below the 'Create free account' button, there is a link: 'Already registered? **Log in instead**'.

1 Email • 2 Password • 3 Create account

Check junk/spam if the email is missing. First sign-in can take longer while the account service starts. Wait for its reply before trying again.

3. Connect Zoom securely

Connect the account that hosts your training courses.

Click Connect Zoom

TrainerMate opens the approval flow in your normal browser.

Check the Zoom account

Sign in on Zoom's own website. Make sure the account is the one you use for courses.

Approve and return

Choose Allow or Approve. Return to TrainerMate and wait for the connected account to appear.

1 Connect Zoom

Your Zoom password belongs on Zoom's own sign-in page. TrainerMate does not ask you to type it into the app.

4. One Zoom account or several

Connect every training account before assigning providers.

Check the saved account

Look for Already connected beside the correct account.

Add more if needed

Use Connect another Zoom account for any other account you deliver courses with.

Continue to providers

Choose All connected - add a provider. Each provider will be paired with a specific saved Zoom account.

1 Connected account • 2 Continue

To reconnect later: Connections > Manage Zoom. Use Reconnect Zoom when offered. Removing an account keeps provider pairings saved, but you must select a usable account before checking courses.

5. Add and test a FOBS provider

Use the credentials you already use on the provider portal.

Choose the provider

Select the organisation that supplies your courses from the Provider list.

Choose its Zoom account

Pick the connected account that should host that provider's courses.

Enter the FOBS login

Enter the provider's FOBS username and password. These are not your TrainerMate login details.

Add and test

Click Add and test provider. Wait for success before adding another provider or starting a course check.

Zoom is connected. Choose the organisation that supplies your courses, select the Zoom account you just connected, then enter the same username and password you use on that provider's FOBS website.

- 1 Provider
Essex
- 2 Zoom account for this provider
Training Zoom - alex.trainer@example.com
- 3 FOBS username
example.trainer
- FOBS password
.....
- 4 Add and test provider

1 Provider • 2 Zoom account • 3 FOBS credentials • 4 Add and test

Add other providers through Connections > Add or manage providers. Some providers are read-only or supply their own Zoom links; respect the provider's arrangement.

6. Run a first course check

Free checks up to 3 weeks ahead; Pro up to 12 weeks.

Run the full check

On Dashboard, click Run full 3-week check on Free, or Run full 12-week check on Pro.

Choose a smaller scan

Open Other scans. Choose a provider and an available date range, then click Run this check.

Watch or stop if needed

Show FOBS window is optional for manual checks. Stop sync appears while a check is running.

Read the result

Wait until the check finishes, then review any warnings and the course list.

1 Run check • 2 Other scans

A check can create or update supported Zoom/FOBS joining details. Existing meetings are checked first. A provider that manages its own links is handled according to its settings.

7. Review courses and make decisions

The course list explains what is ready and what needs a look.

Open the full list

Click Show all upcoming courses. Read the provider, course, date, time, status and notes.

Check one affected course

Use Check course only when the button is offered. It applies to that selected course.

Choose an existing meeting carefully

If a possible Zoom meeting is offered, choose Use this Zoom meeting only when it is definitely correct. Otherwise choose Create a new meeting.

Confirm a removal carefully

Remove from TrainerMate is offered only in some cases. Use it only after confirming the course is no longer live in FOBS.

PROVIDER	COURSE	DATE	TIME	SYNC STATUS	NOTES
Essex	NSAC	8 Oct 2026	09:00	Ready	FOBS and Zoom details verified
Essex	Motorway Awareness	9 Oct 2026	14:00	Please check	This course needs a check Check course only
Essex	What's Driving Us	12 Oct 2026	18:30	Ready	FOBS and Zoom details verified

1 Course list • 2 Check one course

Ready is the result of the app's checks, not a replacement for your final professional check. Confirm dates, joining details and provider requirements before delivery.

8. Manage connections and fix a login

Use Connections when a saved account needs attention.

Manage Zoom or providers

Connections shows the account, Zoom and provider status. Open Manage Zoom or Add or manage providers.

Update a provider login

Open the provider's details, enter the correct FOBS credentials and click Save and test login.

If a password expired

Change it on the provider's FOBS website first. Then update and test it in TrainerMate.

Check and repair

Run Check & Repair TrainerMate to check saved connections and refresh Zoom access. Use Copy report if support asks.

1 Check and repair

When a provider login fails, TrainerMate pauses that provider's actions to avoid repeated failed logins. Fix the underlying login instead of repeatedly starting another check.

9. Pay for TrainerMate Pro

Optional upgrade: all three options give the same Pro access.

Open Upgrade

Choose Upgrade in the sidebar, or See upgrade options in the account menu.

Choose a plan

£5 one-month pass: one payment, no renewal. £5 monthly: renews each month. £40 annually: renews every 12 months.

Complete secure payment

The app opens Stripe checkout in your browser. Confirm the plan and enter card details on Stripe only.

Confirm Pro is active

Return to TrainerMate. If needed, wait a few moments and click Check plan now. If Pro is already active, do not buy it again.

1 One-month pass • 2 Monthly • 3 Annual • 4 Check plan

You can also pay via trainermate.xyz/pricing.html > Choose a secure payment option. Sign in with the same TrainerMate ID/email and password, then choose a plan. Do not create a second account.

10. Billing, cancellation and receipts

Manage payment without losing your saved setup.

Manage Stripe billing

Open your Upgrade/account page and choose Manage Stripe billing when available.

Cancel future renewal

Use Cancel renewal at period end. Pro continues until the paid period ends, then the account returns to Free.

Understand the one-month pass

The one-month pass does not renew automatically. Buy another pass only when you need another paid month.

Find receipts or a licence

Payment history offers receipts/invoices when available. If support gave you a licence key, use Activate licence rather than paying again.

1 Manage billing • 2 Cancel renewal

Cancellation does not refund the current paid period. Saved providers, Zoom pairings and settings are retained. Accounts with non-Stripe Pro access may not show Stripe management controls.

11. Turn on automatic checks (Pro)

Automatic updates means course checking, not installing app updates.

Switch it on

Open Automatic updates and tick Automatically keep my courses up to date.

Save the setting

Click Save automatic update settings. The status explains whether automatic checks are on.

Keep the app running

TrainerMate must be open, with Pro active, and the PC awake and online.

Start with Windows

Use the Start with Windows control if offered. If Windows controls the setting, check Windows Settings > Apps > Startup.

1 Enable automatic updates • 2 Save settings

A closed app or sleeping/offline PC cannot perform a live provider check. Microsoft Store handles software updates separately.

12. Choose schedules and notifications

Open Change schedule only when you want to change the defaults.

Daily light check

Choose the daily time and scope. A 14-day daily scope is recommended in the app.

Weekly wider check

Choose the weekly day and time for a wider check, up to the Pro window.

Choose notifications

Keep problem notifications on. Course changes, support messages and small pop-up bubbles are separate choices.

Save and test

Save automatic update settings. Troubleshooting > Run quiet check now starts a background check using the saved settings.

The screenshot shows the 'Change schedule' settings screen. It is titled '1 Change schedule' in a blue box at the top left. The main content area has a light blue background and contains the following sections:

- Daily light check**: A toggle switch is turned on. To its right is a 'Daily time' dropdown menu set to '07:00'.
- Daily scope (how many weeks ahead?)**: A dropdown menu is set to 'Next 14 days - 2 weeks ahead (recommended)'. Below it, a note says 'Recommended: 14 days / 2 weeks. The weekly check looks further ahead.'
- Weekly wider check (up to 12 weeks on Pro)**: A toggle switch is turned on. To its right is a 'Weekly day' dropdown menu set to 'Sunday'.
- Weekly time**: A dropdown menu is set to '08:00'. Below it, a note says 'Wider check means the full Pro window, normally 12 weeks ahead.'
- Gentle notifications**: Two toggle switches are both turned on: 'Use TrainerMate notifications' and 'Tell me when courses are found or updated'.

1 Change schedule

Scheduled checks run after the chosen time while TrainerMate is open. A missed check can run when the app next opens; it waits if another check is already running.

13. Use the calendar (Pro)

See the saved course diary and focus on what needs attention.

Choose a view

Open Calendar. Use month, week or list view; This week is a quick route to the current week.

Filter attention items

Please check focuses on courses needing attention. All courses restores the unfiltered view.

Open a course

Select a calendar entry to see its details and the available provider/course tools.

Refresh the underlying information

Run a Dashboard course check when you need fresh provider data. The calendar uses TrainerMate's saved course records.

1 This week • 2 Please check

Provider colours help you distinguish courses. Initial calendar loading can take a few seconds. Free users can still review their course list on Dashboard.

14. Help, messages and diagnostics

Keep a support conversation together in one place.

Send a message

Open Help. Enter a subject and explain the issue, including provider, course date and what you clicked. Choose Send.

Read the reply

Return to the Message centre and open the conversation. Unread indicators highlight new replies.

Keep your inbox tidy

Use Mark read or Archive when appropriate. Delete permanently removes a conversation from your inbox.

Share useful diagnostics

Open Support details and diagnostics only if support asks. Use the app version and a connection report to explain the problem.

New message
Start a new support conversation

1 Subject

2 Message

Example: I tried to sync Lincolnshire. It found the course but the Zoom link was missing.

3 Send

INBOX

1 Subject • 2 Message • 3 Send

Never send passwords, login codes, tokens or payment card details. You can also email support@trainermate.xyz. Avoid screenshots containing unnecessary delegate information.

15. Accounts, updates and what's next

Keep setup simple after the first run.

Remember me and log out

The account menu at the top right contains Remember me on this computer and Logout. Use Remember me only on a computer you trust.

Reset a forgotten password

On the login screen, choose Forgot password? Enter the registered email and follow the one-time reset-code instructions. The code expires after 15 minutes.

Update the app

Open Microsoft Store and check for app updates. Store installations do not use a separate TrainerMate installer update.

Certificates are coming soon

In release 2.0.0, Certificates is disabled and marked Coming soon. Continue using your provider's own portal for certificate tasks until the feature is released.

1 Create free account • 2 Log in

If setup or payment takes longer than expected, check your connection and read the on-screen message. Do not register or pay repeatedly. Use Connections or Help for a persistent problem.
